Attention Mr. L. Lykken

Gentlemen:

Attached is a copy of a confidential report from Dr. Hine et al, University of California, on the vapor toxicity of Nemagon (1,2-dibromo-3-chloropropane).

I know from discussions with Dr. Hine that data of this type has been secured by the Dow Chemical Company. Dow in particular has been very upset by the effect noted on the testes.

Sometime when you or Lou Mitchell are on the West Coast, you may wish to discuss this data with Dr. Hine personally.

Very truly yours,

E. F. Feichtmeir

E. F. Feichtmeir, Manager
Product Application
